Canvas photos are photos printed onto a large canvas surface. The canvas is carefully stretched onto a wooden frame, resulting in a finished image that the customer can hang up as a decoration like a painting.

Unlike copies or prints on ordinary paper, the fine structure of the canvas lends a certain feeling of depth, making the original photo appear more imposing and high class, giving it that "designer touch. The depth of the frame helps to enhance this feeling.

If you are considering a canvas print, please discuss your requirements with us prior to placing your order.
